

EN . Scope of delivery

- A** 1x CAGE SHIFTER+ with mounted nuts & bolts
- B** 4x Klett-Strap short
- C** 4x Accessory adapter
- D** 2x Klettstrap long, with rubber strap
- E** 2x Frame protection film

EN . Variation 1: Use on the bottle cage holes

- 01 EN .** Preparing the CAGE SHIFTER+ (A):
- a. Attach the required accessory adapters (C) to the wings of the CAGE SHIFTER+ (A).
 - b. Route the short hook and loop fasteners (B) through the opening on the prepared CAGE SHIFTER+ (C) with the hook and loop side facing the bike.

- 02 EN .** Screw the CAGE SHIFTER+ (A) to the frame in the desired direction. Screw the bottle holder to the CAGE SHIFTER+ (A) with the screws supplied
- Attention:** Only use the screws supplied to avoid damage to the frame.

- 03 EN .** Secure the accessory with the short hook and loop fasteners (B) and shorten all protruding hook and loop fasteners.

EN . Variation 2: Use as ANYWHERE solution

- 01 EN .** Preparing the CAGE SHIFTER+ (A):
 a. Attach the required accessory adapters (C) to the wings of the CAGE SHIFTER+ (A).
 b. Route the long hook and loop fasteners with a rubber tab (D) from below through the opening on the prepared CAGE SHIFTER+ (C) as indicated.

- 03 EN .** Apply frame protection film (E) at the necessary points; clean these points beforehand. Secure the CAGE SHIFTER+ (A) with the long hook and loop fasteners with a rubber tab (D) at the desired point. Make sure that the rubber tab is flush between the CAGE SHIFTER+ (A) and the frame. Tighten the hook and loop fasteners securely with the rubber tab (D) for a secure hold.

- 02 EN .** c. Route the short hook and loop fasteners (B) through the opening on the prepared CAGE SHIFTER+ with the hook and loop side facing the bike.

Tip: Use the long hook and loop fastener with a rubber tab (D) as a guide. To do this, attach the short (B) and long hook and loop fasteners (D) to each other and pull them together through the opening.

- 04 EN .** Screw the bottle holder to the CAGE SHIFTER+ (A) with the screws supplied.
Attention: Only use the screws supplied to avoid damage to the frame. Secure the accessory with the short hook and loop fasteners (B). Shorten all protruding hook and loop fasteners.

EN . Safety information:

- Check that the CAGE SHIFTER+ is securely mounted every day before setting out on your bike
- Shorten hook and loop fasteners that are too long (risk of accident)
- Mount the CAGE SHIFTER+ only where it cannot come into contact with the tyre / spokes. Risk of accident!
- Only use the screws and hook and loop fasteners supplied to avoid damage to the frame
- Use frame protection film to avoid damage to the frame.
